TSZC Bottyán János Technical
Secondary School
2014 - 2020

ABOUT

Full-Stack Software Engineer with hands-on experience building modern web and mobile applications and solving complex technical challenges. Experienced in developing scalable business systems, AI-powered applications, LLM integrations, and Model Context Protocol (MCP) servers, with a strong focus on clean architecture and real business impact.

EXPERIENCES

Full-Stack Software Engineer | DRB Services Kft.

May 2025 - Present

- Develop and maintain full-stack web and mobile applications using modern frontend and backend technologies.
- Design and implement integrations with third-party platforms, including Shopify, shipping providers, authentication services, and AI-powered solutions.
- Build scalable APIs, business logic, and database solutions for warehouse management, inventory, and e-commerce systems.
- Develop AI-powered features, including LLM integrations and Model Context Protocol (MCP) servers.
- Collaborate with cross-functional teams to deliver high-quality software from concept to production while continuously improving performance, reliability, and user experience.

Full-Stack Developer | Pallatrax Hungary Kft.

June 2023 - May 2025

- Designed, developed, and maintained full-stack web applications, including e-commerce platforms and custom business solutions.
- Contributed to the development of internal systems such as a custom CRM, warehouse management, and courier management applications.
- Implemented new features, integrated third-party services, and optimized application performance across both frontend and backend.
- Collaborated with stakeholders to translate business requirements into scalable, maintainable software solutions.
- Participated in the full software development lifecycle, from planning and architecture to deployment and ongoing maintenance.

LANGUAGES

- Hungarian - Native Speaking
- English - Upper Intermediate (B2)
